Upgrades continue at Mittagong Library

Mittagong Library is an important informational, educational, social and cultural institution that is located within a historically significant heritage listed sandstone building.

Wingecarribee Shire Council will be continuing with its plans to upgrade the Mittagong Library facility in September 2019 with the renovation and restoration of the existing roof.

These works follow on from the successful stage one *Mittagong Library Energy Efficiency Upgrade* (MLEEU) project completed earlier this year.

The MLEEU project included the installation of a new air conditioning system, new LED lighting, a new building insulation envelope and the creation of a new study area.

These upgrades will concentrate on external improvements to the building with the removal and installation of a new roof. This work includes the removal and replacement of the galvanised roof sheets, ridge capping, flashing, gutters and down pipes, timber batons and spotlight fittings.

The interior painting will be completed in this upgrade and will add to the buildings charm while increasing the effectiveness of the new lighting system. The external painting of the facility will coincide with the completion of these works.

These planned works are scheduled to take place from 2 September 2019 for approximately four weeks subject to weather conditions.

The Wingecarribee Mobile Library will be providing a library service from this site every Wednesday and Friday from 10am to 4.30pm.

The popular storytime program will be held each Thursday between 11 and 11.30am at the Girl Guides Hall, which is adjacent to the Mittagong Library at 10 Albert Street in Mittagong.

For more information and pictures during the upgrades please visit www.library.wsc.nsw.gov.au.

When the Library reopens, you will be using an modernised library that has had a well-deserved face lift.
